

Project Self-Evaluation

Name student + Group:

Daphne Harmsen, Shrimp council

.....

Competency Project-based working

The student adeptly contributes to a positive, collaborative, and innovative team environment, demonstrating effective time management, professional communication, creative thinking, a solution-oriented mindset and adaptability, ensuring quality assurance in project execution.

Procedure:

1. Fill in the self-evaluation
2. Evaluate, reflect and set goals
 - Analyse the peer feedback you received and write a summary.
 - Compare the summary with your self-evaluation and reflection.
 - Based on your reflection, draw your conclusions.
 - Based on your conclusions, set goals for the future.
3. Upload
 - Upload this form to Bright Space

1. Self-evaluation:

Proactive team collaboration

I recognise myself in the following statements:

- ☐ I showed leadership
- ☒ I took ownership of tasks
- ☒ I completed the agreed work with attention to quality
- ☐ I actively helped the group when problems occurred
- ☒ I was consistently highly productive
- ☐ I avoided responsibility or needed frequent reminders

Reflection:

At the beginning of the project we agreed that I would model the needed 3D assets for the rooms we wanted, the original plan was to make and finish 1 room every week for a total of 3 rooms at the end of the project but I ended up being able to make 1 within 3 days rather than a week. Because of this we agreed for me to switch to UI art for the remaining project time, since the 3D assets ended up taking less time and the UI art ended up taking more time than expected.

Planning & Reliability

I recognise myself in the following statements:

- ☒ I properly used project planning tools
- ☐ I helped the team keep track of deadlines
- ☒ I consistently met the deadlines
- ☐ I set realistic priorities and scope
- ☐ I communicated early when deadlines were at risk
- ☐ I caused delays without clear communication

Reflection:

My tasks ended up taking less time than expected to complete, which meant I was able to take on extra tasks and help others out with theirs. I did my best to update my own Trello tasks whenever I completed my work.

Collaboration & Communication

I recognise myself in the following statements:

- ☒ I was present, focused, and prepared for meetings
- ☒ I listened actively to others
- ☒ I responded to others in a respectful and appropriate way
- ☐ I did address communication issues/conflicts
- ☐ I created space for others to speak or take responsibility
- ☒ I was on time for meetings and present to deliberate
- ☐ I dominated discussions or distracted the group

Reflection:

I was able to be on time for all our meetings, and I tried to be present and listen to others during these meetings. I did not address communication issues or conflicts because when they did occur the person affected would speak up about it and I personally did not have any communication issues.

Learning Attitude

I recognise myself in the following statements:

- ☒ I was open to feedback
- ☒ I reflected on my own behaviour or decisions
- ☒ I adjusted my approach during the project
- ☐ I repeated the same issues without reflection

Reflection:

I tried to stay open minded and be open to the possibility that I don't know everything, so I was able to learn new things when it comes to 3D modeling as well as 2D art.

2. Analyse Peer feedback

Summarise what you noticed across the peer feedback you received.

- What feedback appeared multiple times?
- What surprised you?
- Where do peers see strengths or risks?

It was mentioned on all feedback forms that people would like me to speak up more and give more input for ideas.

I was not particularly surprised by anything, I think I am aware of how I acted and worked within the team.

Strength: willingness to learn, stepping up and helping others when needed. Weakness I guess would be being more quiet and not speaking up with input or ideas.

Reflection

Compare your self-assessment with the peer feedback.

- Where do they align?
- Where do they differ?
- What does this tell you about your behavior or blind spots?

The feedback I received does not per se align with how I filled out my own assessment, but it does align with how I know I tend to act/ operate in team projects.

Conclusion

Based on your reflection, draw your conclusions.

What are your main takeaways from this project about how you work in a team?

I think I have a good attitude, I am open to learning, but people have said they want me to speak up more.

Learning goals

Formulate concrete, behavioral goals.

- Becoming more comfortable/confident with speaking up when I have ideas or suggestions.
