

Peer feedback form

Student providing feedback:

Daphne Harmsen

Student receiving feedback:

Dennis

Proactive team collaboration

Did this student actually move the project forward?

I experienced that this student:

- ☒ Showed leadership
- ☒ Took ownership of tasks that were assigned
- ☒ Completed tasks with attention to quality
- ☒ Actively helped the group when problems occurred
- ☒ Was consistently highly productive
- ☐ Avoided responsibility or needed frequent reminders

If possible, provide a concrete example:

As lead artist he showed good leadership and decisiveness for what the assets should look like. He was able to model assets much faster than initially expected without compromising on quality. He was also able to help me out with modeling when I needed help.

Planning & Reliability

How did they handle time, priorities, and commitments?

I experienced that this student:

- ☒ Properly used project planning tools
- ☐ Helped the team keep track of deadlines
- ☒ Consistently meets deadlines
- ☒ Set realistic priorities and scope
- ☐ Communicated early when deadlines were at risk
- ☐ Caused delays without clear communication

If possible, provide a concrete example:

From what I saw he kept out Trello up to date and was able to finish his tasks on time or earlier than expected.

Collaboration & Communication

How did they behave in group work and meetings?

During collaboration, this student:

- ☐ Was present, focused, and prepared for meetings
- ☐ Listened actively to others
- ☐ Responded to others in a respectful and appropriate way
- ☐ Did address communication issues/conflicts
- ☐ Created space for others to speak or take responsibility
- ☐ Was on time for meetings and present to deliberate
- ☐ Dominated discussions or distracted the group

If possible, provide a concrete example:

He was significantly late a few times but always listened actively and was focused and prepared when he was there during meetings/daily standups.

Learning Attitude

Did they learn and adapt during the project?

I experienced that this student:

- ☐ Was open to feedback
- ☐ Reflected on their own behaviour or decisions
- ☐ Adjusted their approach during the project
- ☐ Repeated the same issues without reflection

If possible, provide a concrete example:

Since he was lead Artist, I think there was less opportunity for him to learn from others, but he did take initiative to learn how to make decals to use for the project.

TOP:

What behaviour of this student had the most positive impact on the project?

His experience with modeling has been very valuable and for me I've been able to learn new things because of this.

TIP:

What is one concrete behaviour this student could improve next time?

I think the only thing that could be improved is being a bit more mindful in how he communicates, especially when he doesn't understand something or doesn't agree he can be quite rigid or seem harsh when its perhaps not intended like that.
